CUSTOMER COMPLAINT NOTIFICATION

Reference No.:	SFPL/QA/CC/2026/0188
Date of Complaint:	18-Jul-2026
To:	Head - Quality Assurance, AIVOA Pharmaceuticals Ltd.
From:	Ms. Rekha Nair, Manager - Quality Assurance, Sunrise Formulations Pvt. Ltd.
Mode of Receipt:	Email, followed by this formal written notification

1. PRODUCT AND BATCH DETAILS

Product Name:	Metformin Hydrochloride API
Grade / Standard:	IP/BP
Batch / Lot No.:	MFH260712A
Date of Manufacture:	12-Jul-2026
Date of Expiry:	11-Jul-2029
Quantity Supplied:	500 kg (20 HDPE drums x 25 kg)
Quantity Affected:	75 kg (3 HDPE drums)
Invoice / GRN No.:	AIV/INV/2026/4471 dated 14-Jul-2026

2. DESCRIPTION OF COMPLAINT

During pre-dispensing sampling and visual inspection carried out at our Ankleshwar facility on 17-Jul-2026, our QC analysts observed that the material contained in three of the twenty HDPE drums received under the above batch exhibited a distinct off-white to pale yellow discolouration, in contrast to the white crystalline powder described in the approved specification and observed in the remaining seventeen drums of the same consignment.

Additionally, the affected drums showed evidence of caking and lump formation, with hard aggregates that did not disperse readily on gentle agitation. The inner LDPE liner of drum number 7 was found to be improperly heat-sealed, with a visible gap of approximately 40 mm along the seal line, which we believe may have permitted moisture ingress during transit or storage.

Preliminary loss-on-drying testing performed on a composite sample drawn from the three affected drums returned a result of 1.28% w/w, against the specification limit of not more than 0.50% w/w. The related substances profile is currently under investigation and results will be shared separately.

The affected drums have been segregated and placed under quarantine in our rejected materials area pending your investigation. No material from this batch has been released to production.

3. IMPACT AND ACTION REQUESTED

This batch was scheduled for use in the manufacture of Metformin SR 500 mg tablets for the domestic market. The shortfall has placed our production schedule at risk. We request that you initiate a formal investigation under your complaint handling procedure, provide a root cause analysis and CAPA report within 30 calendar days, and confirm arrangements for replacement material at the earliest.

We further request confirmation as to whether any other batches manufactured in the same campaign may be affected.
